

Cantab Fund Features - C Class

Cantab Asset Management has set up an actively managed, UCITS V authorised multi-manager Open-Ended Investment Company ('OEIC') to provide collective access to the Cantab investment process and research capabilities. As independent advisers, Cantab reviews the whole of the market in the selection of funds for the 'Moderate' and 'Balanced' portfolios within the OEIC.

Active Management

In volatile market conditions, investment opportunities exist if you know where to look and what to look for. They can, however, be time consuming to identify and execute. Cantab takes on the hard work of fund selection by continuously researching, selecting and monitoring funds for the portfolio.

Tax efficiency

Trading undertaken within the fund does not constitute a capital gains tax ('CGT') event for fund shareholders. Therefore, investment decisions are unconstrained by tax considerations. The fund manager can focus on enhancing investment performance alone.

Upon eventual encashment of shares in the OEIC, a CGT liability may arise for individuals and taxable entities. This liability will be a function of the growth in value of the holding since it was purchased, the amount invested and the investor's tax banding. Change of ownership may give rise to a CGT event (other than transfer to spouse), including to a trust. All dividends from the OEIC are liable to tax at the investor's marginal rate.

Clients receive the benefit of active Investment Management but without incurring VAT that arises on Discretionary Investment Management fees.

Transparency and Trust

Daily liquidity and fund pricing allow investors ease of access and accurate valuations. The fund structure is regulated by the Financial Conduct Authority.
